పఠన శక్తి

PATHANA SHAKTHI

The AI co-teacher for India's classrooms

Built to NIPUN Bharat, NEP 2020 and SCERT benchmarks

NIPUN BHARAT BENCHMARKS BUILT IN

Classes 1–10

తెలుగు · English · हिन्दी

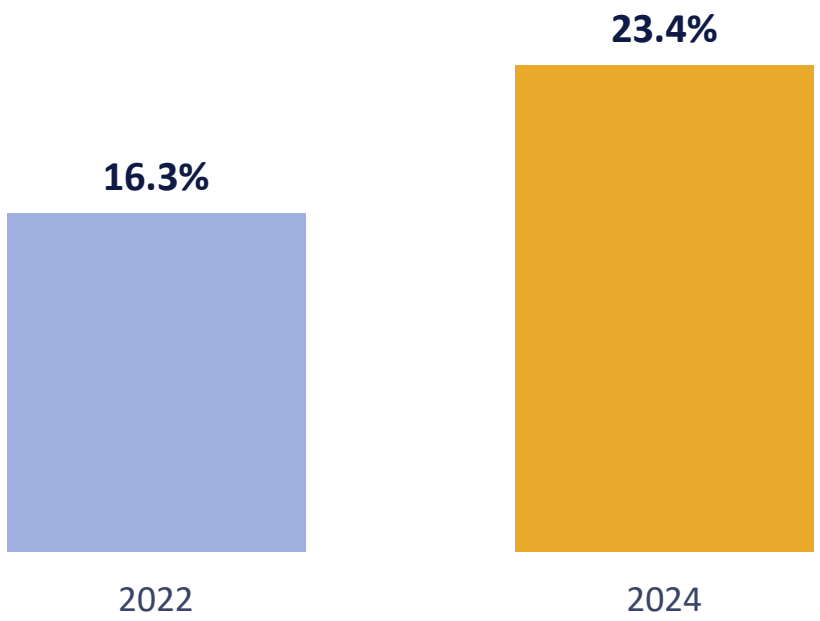

Works offline

THE OPPORTUNITY

Reading is rising in government schools — the goal is every child by Class 3

Class 3 children in government schools who read a Class 2 text

The national goal

NIPUN Bharat: every child reads with understanding and does basic maths by the end of Class 3, by 2026-27.

Benchmarks schools report on

Words correct per minute, comprehension and numeracy — checked in baseline, midline and endline rounds.

Sources: ASER 2024 (rural India), Jan 2025 · NIPUN Bharat, Ministry of Education (2021)

THE SCALE

One of the world’s largest school systems, opened one state at a time

10.2 L

government schools in India

12.4 Cr

children enrolled in them

30,022

government schools in Telangana, our launch state

27.8 L

children in Telangana government schools

Every state runs its own textbooks, in its own language

A product that reads the state’s own books can enter any state without rewriting a curriculum — Telugu today, Hindi and English already in.

Source: UDISE+ 2023-24 (Ministry of Education). L = lakh (100,000); Cr = crore (10 million).

WHAT HELPS A CHILD READ

Children learn to read by reading aloud to someone who listens

More time reading aloud

Every child reads aloud and hears back, every day, while the teacher works with the group that needs them most.

Their own textbook

Practice happens on the chapter the class is studying, so it supports the syllabus instead of competing with it.

Their own language

Telugu and Hindi with every conjunct and matra understood, plus English — the way children learn to read.

Pathana Shakthi gives every child that listener — beside their teacher.

THE PLATFORM

Pathana Shakthi: an AI co-teacher for the whole school

For children

- Read-along that listens
- Maths tests with worked answers
- Animated lessons and workbook
- Practice games and reading check

For teachers

- Reading speed vs NIPUN Bharat
- Need Help · Go Ahead · Very Good
- Registers and assessment rounds
- Shakthi Mitra, an AI agent

For headmasters

- Whole-school roll-up
- Attendance and FLN rounds
- Curriculum pace
- Print and Excel reports

HOW IT WORKS

One textbook in. A whole course out.

Teacher uploads the textbook

Any SCERT PDF — even a phone scan.

Every chapter becomes lessons

Read-along, animated lesson, workbook and tests.

The child reads or solves

Every word heard, every maths answer checked.

The teacher sees who needs help

Against NIPUN Bharat benchmarks, by child.

Classes 1–10

Telugu · Hindi · English

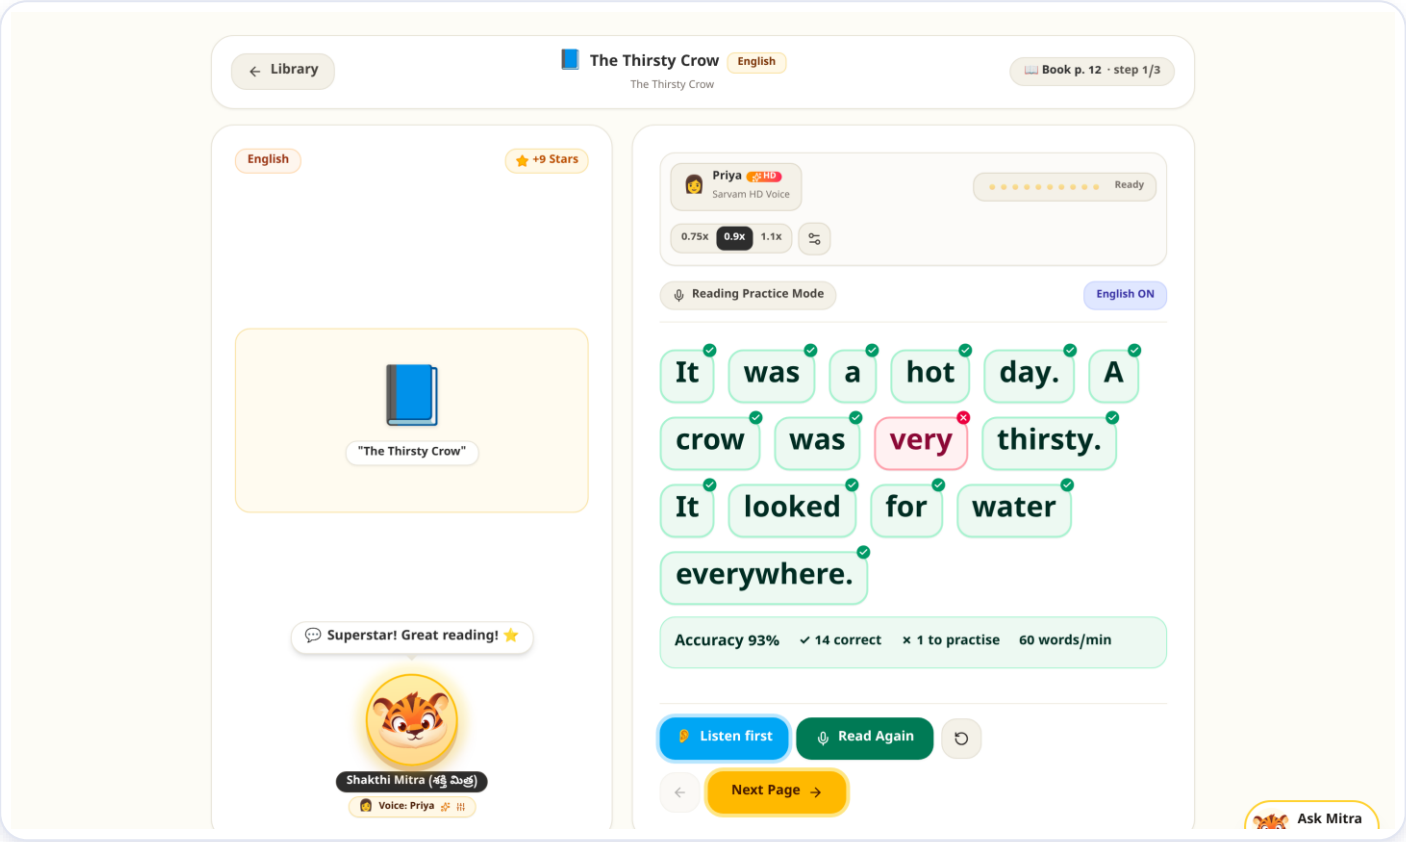

Works offline

Prints everything

FOR CHILDREN · READ-ALONG

A reader that listens to every word

An Indian voice reads first

Beginners listen, then read.

Every word is marked

Right, or one to practise.

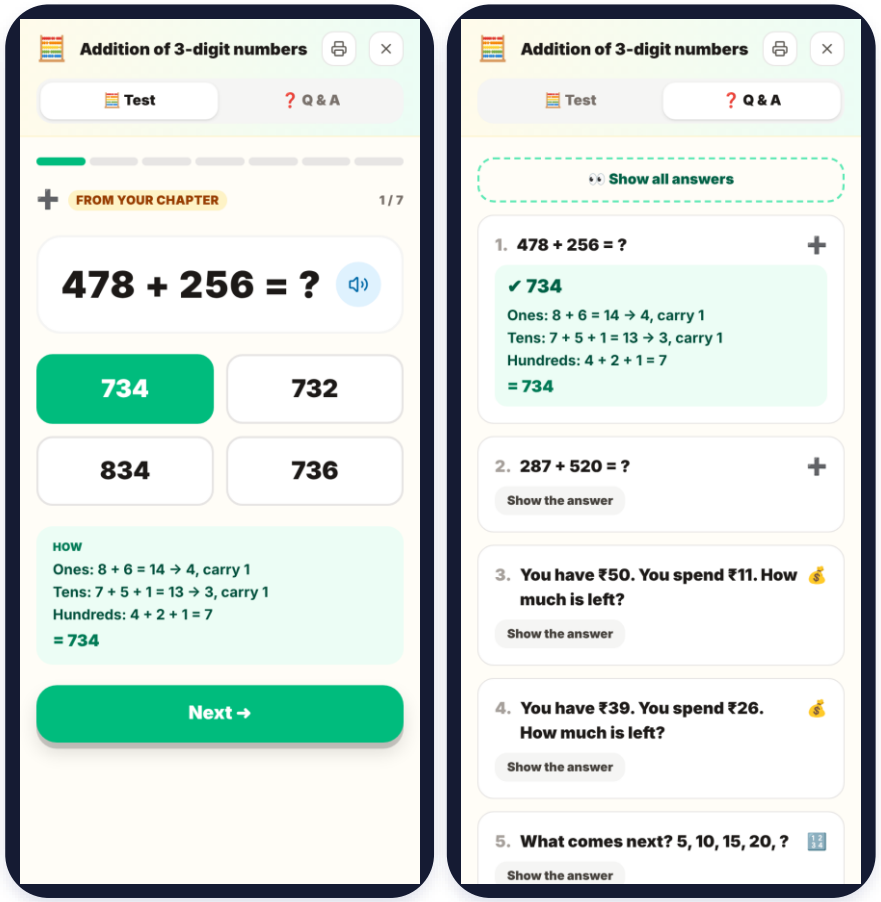

Accuracy and speed, every page

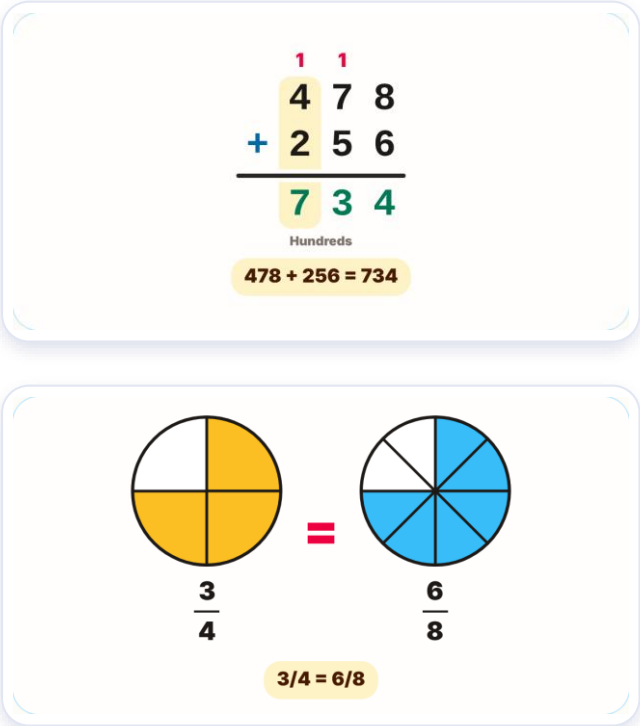

Words correct per minute.

Telugu, Hindi and English

Spelling variants understood.

Maths chapters become tests with worked answers

Animated methods from the chapter

No reading aloud in maths

The chapter's own sums first

Then new ones of the same size.

Every answer worked out

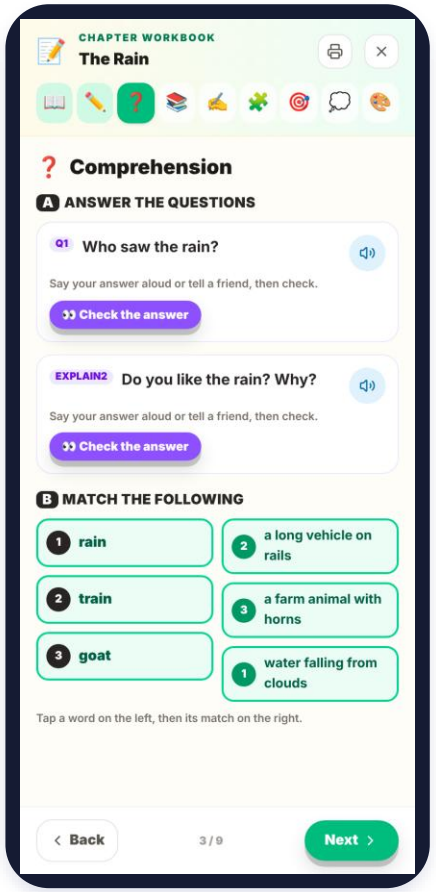

Carries and borrows, step by step.

Results reach the teacher

Numeracy competencies by child.

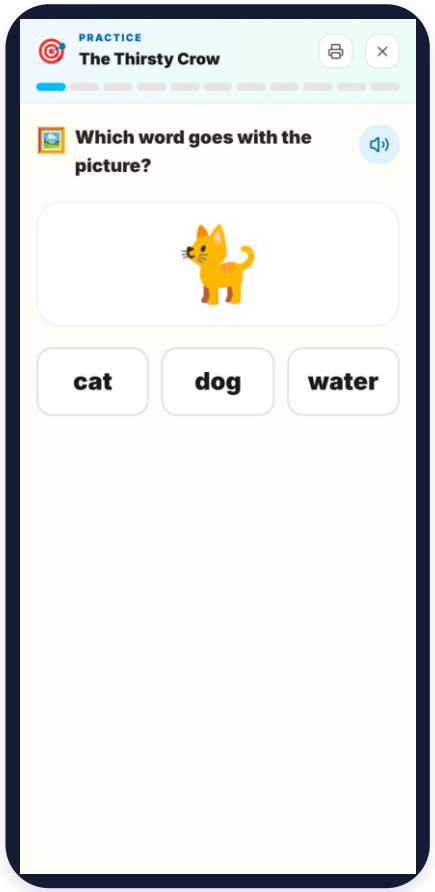

FOR CHILDREN · PRACTICE

A workbook, games and a reading check for every chapter

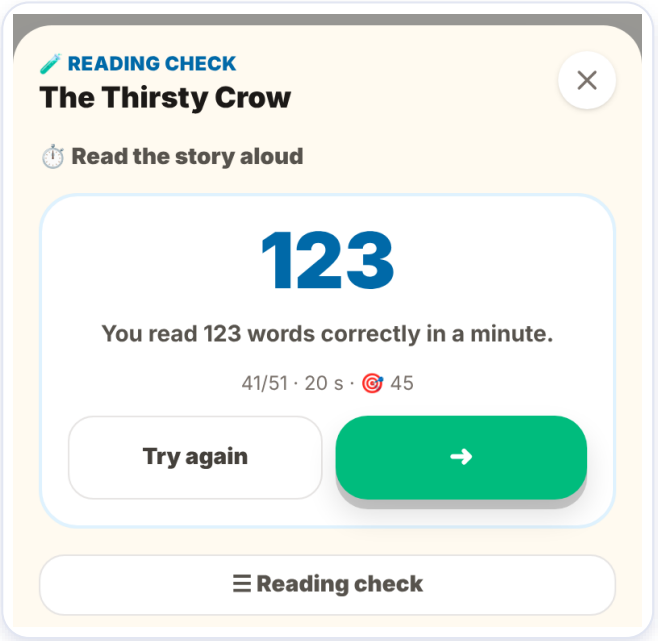

SCERT-pattern workbook

Comprehension, match the following, vocabulary, grammar and writing.

FLN practice games

Picture and word, first sound, missing letter, words in order.

Reading check

Sentences, timed oral reading, comprehension and writing — scored against NIPUN Bharat norms.

BUILT TO GOVERNMENT BENCHMARKS

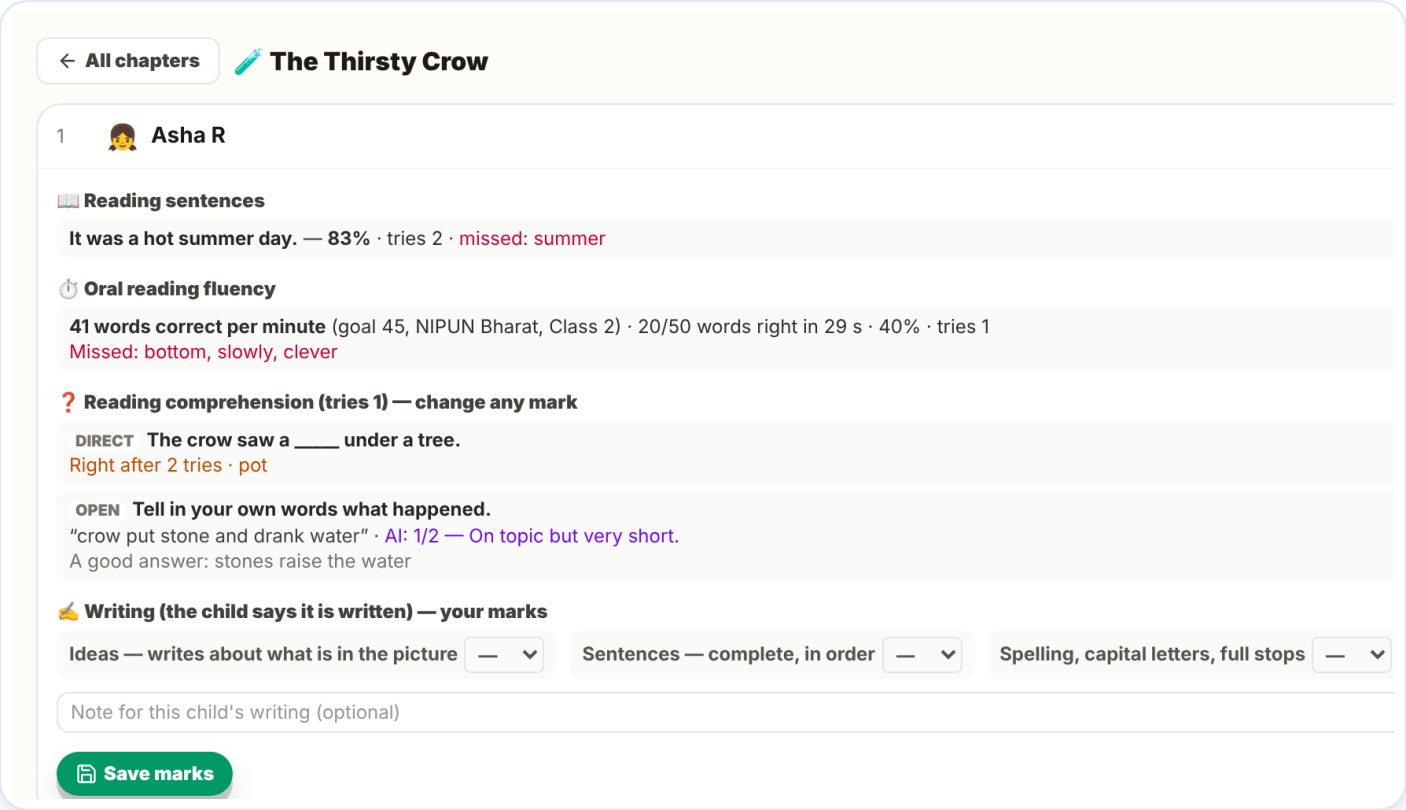

Measured the way the system already measures

Benchmark	What it asks	How Pathana Shakthi meets it
NIPUN Bharat	Every child reads with understanding and does basic maths by the end of Class 3 (2026-27)	Literacy and numeracy competencies tracked for every child from real work
NIPUN Bharat reading speed	Class 2: 45–60 words correct per minute · Class 3: 60	Timed oral reading in every chapter's reading check, scored against the norm
Tholimettu (Telangana)	Telugu reading speed: Class 1: 20 · Class 2: 25 words per minute	Telugu norms used for Telugu chapters
NEP 2020	Foundational learning in the mother tongue	Telugu, Hindi and English — read, heard and checked
SCERT Telangana	State textbooks and the end-of-lesson exercise pattern	Real textbooks uploaded; the workbook follows the SCERT sections
FLN assessment rounds	Baseline, midline and endline levels for every child	Registers pre-filled from the app; the teacher confirms

Pathana Shakthi follows public sources (NIPUN Bharat, Tholimettu, SCERT circulars). It is not an official certification.

FOR TEACHERS

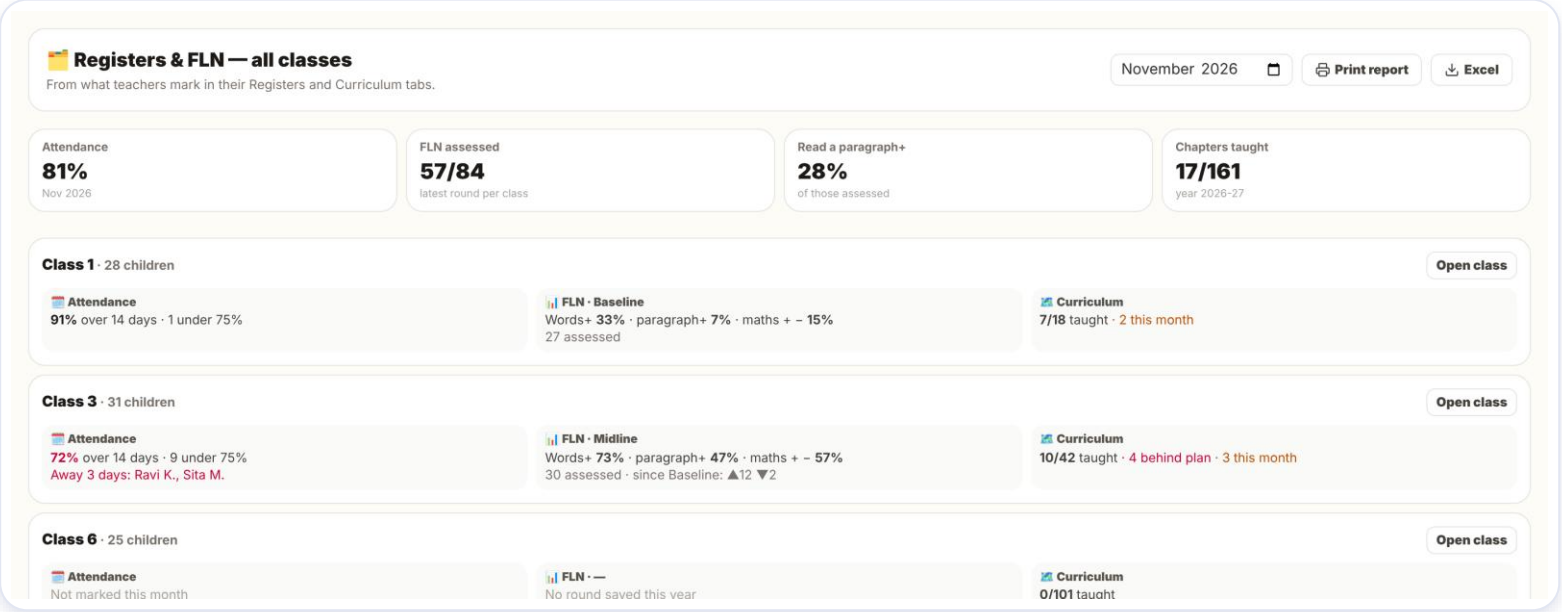

Every child’s reading, in one place

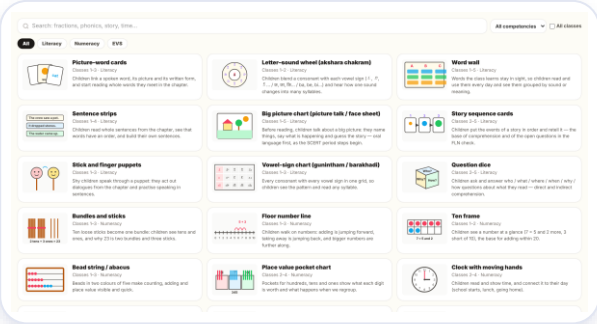

- Reading speed vs NIPUN Bharat
- Need Help · Go Ahead · Very Good
- Registers and FLN rounds
- Curriculum map and day plan
- Teaching-aid library and handbook
- Shakthi Mitra, an AI agent

FOR HEADMASTERS

The whole school, at a glance

Teaching-aid library: 20 low-cost materials with pictures, how to make and use them.

Attendance per class

Children under 75% flagged.

Latest FLN round

Who moved up a level.

Curriculum pace

Taught vs the year plan.

Print and Excel

With a signature line.

FROM THE FIELD

Built in classrooms, with teachers

Field visit, October 2026 — children try Pathana Shakthi with their teacher.

What we saw in schools	What we changed
A hard page stopped a child from moving on	Next opens after one honest try
A teacher heard a robotic voice	Only natural Indian voices in lessons
A child read हूँ right but was marked wrong	Hindi and Telugu spelling variants accepted
Maths does not need reading aloud	Maths chapters became tests with worked answers

WHY NOW

Policy, budget and technology have arrived together

NIPUN Bharat

A national mission for every child to read and do maths by the end of Class 3, with reading-speed goals schools report on.

NEP 2020

Mother-tongue learning in the foundational years — exactly where English-first tools fall short.

Indian speech AI

Natural Indian voices and speech recognition in Telugu and Hindi are now good and affordable for every child.

NIPUN Bharat, Ministry of Education (2021) · National Education Policy 2020

WHY WE WIN

The hard parts are the ones we have already solved

01

Reads real state textbooks

Scanned Indic PDFs, legacy fonts, pictures cropped from scans, speech bubbles kept out of lesson text.

02

Listens to Indian children

Telugu and Hindi matching tuned in classrooms; spelling variants, number words, a measured pronunciation dictionary.

03

Speaks the system’s language

NIPUN Bharat norms, registers and assessment rounds — what teachers and officers already report.

04

Evidence, word by word

Every page read aloud shows which words each child finds hard — and makes the next version better.

BUSINESS MODEL

Priced per child per year, paid by those who fund learning

PRIMARY

State governments

FLN programmes under Samagra Shiksha, district by district.

₹150–300 / child / year

BRIDGE

CSR and foundations

Adopt-a-school and district programmes with measured reading gains.

₹40,000–75,000 / school / year

EXPANSION

Low-fee private schools

The same state textbooks and the same need, paid directly.

₹400–600 / child / year

Low cost to serve: one upload serves every class using that book, and every AI feature falls back to a no-AI version.

Let’s get every child reading.

Empowering every child. Enabling every teacher.
